filehosting provides an easy possibility for you to send large files to your friends. So try our free and simple filehosting service now. Files can be downloaded from any computer from our high speed servers. Unfortunately, we can't make that part free. You decide who you want to share your files with. Your walletwill be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device. File is free to use with no gotchas and no hidden fees. If only we could, we surely would! On the other hand, usingfile can actually save you money. We have no file size limit. Our service is completely free for everyone. Files transferred the old-fashioned way tend to pile upand be forgotten about, eventually costing you money in data storage fees. It is also allowed to link to the download page from websites and communities.

Alternatively you can choose to share your download links on blogs, forums and social networking sites. You can upload any type of file (movies, music, documents, images, zip files and more). Any file in any format can be uploaded and downloaded for free. You can give this download link to your friends by mail or instant messenger. You don't need any special software installed to be able to download your files. Keep your files private, or send your download links only to friends or family. Using file, you can circumvent those limits without paying to upgrade your team chat service. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. Just upload the file you want to share with your friends and we send you a download link to your file. The cost of that data transfer is covered by your internet service or the data plan on your phone. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. There are no restrictions
